

## Greenhouse Gas (GHG) Emissions Data - Scope 1 and Scope 2

As part of our commitment to environmental sustainability and carbon footprint reduction, we present the data on greenhouse gas (GHG) emissions, divided into **Scope 1** and **Scope 2**, for the year 2023.

In 2023, direct and indirect emissions amounted to:

| <b>DIRECT EMISSIONS</b>                         | <b>tons of CO<sub>2</sub></b> |
|---|-------------------------------|
| Scope 1<br>(related to natural gas consumption) | 15.210,16                     |

  

| <b>INDIRECT EMISSIONS</b>                            | <b>tons of CO<sub>2</sub></b> |
|--|-------------------------------|
| Scope 2<br>(calculated with the Market based method) | 0                             |

Among the company's objectives is the progressive neutralization of Scope 1 emissions through initiatives to reduce energy consumption and mitigate and offset emissions.
